EDUCATION

Sookmyung Women's University <i>Bachelor of Artificial Intelligence Engineering (GPA 4.43 / 4.5)</i> <i>Bachelor of Big Data Engineering (GPA 4.5 / 4.5)</i>	Seoul, South Korea Mar. 2023 – Aug. 2027(Expected)
California State University, Fullerton <i>Computer Science</i>	California, United States Aug. 2024 – May 2025

SKILLS

Languages: Korean(Native), English(Advanced Mid)
Tools: Notion, MS Office, Figma, Google Docs
Tech: Python, Git, MLOps, React, SpringBoot, Airflow, AWS
Certificate: ADsP(Advanced Data Analytics Semi-Professional), SQLD(SQL Developer), OPIC English Advanced Mid

EXPERIENCE

ACM OpenSourceSoftware Officer <i>California State University, Fullerton</i> - Held regular meetings with 12 members as an officer of the largest CS community at school - Hosted 10+ workshop sessions, having 30+ students learn topics such as SvelteKit and Git usage - Continually maintained and managed the club's official website, acmcsuf.com - Resolved multiple issues on GitHub for the webpage, added new features, and deployed version 9.0 of acmcsuf.com	Jan. 2025 – May 2025 <i>California, United States</i>
AI Hackathon Winner & Global AI Scholar <i>Daewoong Foundation</i> - Won AI hackathon and selected as a Global AI Scholar by Daewoong Foundation for technical excellence - Led end-to-end development of BearIndonesia, automating collection of 1,600+ articles/month across 16 channels - Designed a 3-stage filtering pipeline to surface only strategically relevant articles to Indonesia Business Team - Collaborated with the team stakeholders to analyze requirements, delivering a service now active in production - Built full-stack service with Spring Boot, FastAPI, React, PostgreSQL, Docker, Nginx, and OpenAI API	Sep. 2025 - Jan. 2026 <i>Seoul, South Korea</i>
Daewoong Pharmaceutical AI Development Team Intern <i>Daewoong Pharmaceutical</i> - Drove company-wide AX initiatives as a member of the AI Development Team - Adapted an open-source LLM evaluation harness framework to assess internal LLMs under standardized criteria - Formalized an LLM evaluation pipeline to support data-driven model selection and replacement decisions - Developed an internal MCP plugin integrating GitLab and Notion to automate repetitive workflows for the team	Feb. 2026 – Present <i>Seoul, South Korea</i>

PROJECTS

Enhanced Diary App <i>Java, Python, Android Studio, Git, Spotify API</i> - Won 1st place at 2024 IPS (IT/AI Project Competition Sookmyung) - Used Spotify API to develop a song recommendation system that fits the atmosphere of the diary - Developed over existing apps by using artificial intelligence to visualize connected memories of the diary - Collected 110,000 open-source AI datasets from AI-HUB and preprocessed them to achieve a final accuracy of 0.97	Apr. 2024 – May 2024
AI Powered ASL Transcriber <i>Tensorflow, OpenCV, MediaPipe, Flask, Socket.IO</i> - Awarded “Most Technical Project” among 400+ student submissions for excellence in technical implementation - Built a real-time American Sign Language (ASL) recognition web application - Trained a CNN model to classify ASL signs from webcam input and integrated it into a live web interface - Designed a futuristic UI/UX with animated backgrounds, section dividers, and a dynamic team profile	Apr. 2025
Automated Expense Verification Pipeline <i>FastAPI, Airflow, GPT-4o, PostgreSQL, Streamlit</i> - Built an AI audit pipeline to assist manual review of 350 expense reports/month as a company-wide AX initiative - Formalized 13 review criteria into a rule engine, invoking GPT-4o selectively for edge cases to minimize AI costs - Automated full pipeline — document crawling, AI review, CSV export, and email delivery daily — via Airflow - Delivered a Streamlit dashboard enabling business users to modify LLM prompts and monitor audit results directly	Mar. 2026
